

Cleaning Graffiti off Finishes Technical Bulletin

TB022

Category: EIFS, Stucco

Keywords: EIFS, Graffiti, Cleaning

Parex USA does not manufacture a graffiti resistant finishes, nor do we have a recommendation of another product to protect our finish coats from graffiti. However if the graffiti is already on the finish, Parex USA recommends following the Parex Commercial EIFS Maintenance Guide.

If the Maintenance Guide instructions in conjunction with the EIFS cleaners are not successful after one or two attempts then the existing surface will need to be re-coated or re-finished. Parex suggests first using an acrylic Premium KILZ primer over the graffiti to reduce the potential of the graffiti to bleed through prior to applying the new coating or finish to the substrate.

Please make this information available to all parties involved with this project.
